Item Name	Address	Suburb	LGA	Item No.
10 CWT Jib crane	Bay 1 Locomotive Street	Eveleigh	Sydney	4745046
10 CWT Jib-Crane	Bay 2 Locomotive Street	Eveleigh	Sydney	4745084
10CWT Jib Crane	Bay 1 Locomotive Street	Eveleigh	Sydney	4745055
20CWT Steam Hammer	Bay 1 Locomotive Street	Eveleigh	Sydney	4745057
2-Ton Jib Crane	Bay 2 Locomotive Street	Eveleigh	Sydney	4745076
40CWT Arch Steam Hammer	Bay 1 Locomotive Street	Eveleigh	Sydney	4745054
6' plate rollers	Bay 2 Locomotive Street	Eveleigh	Sydney	4745180
7 CWT Jib crane	Bay 1 Locomotive Street	Eveleigh	Sydney	4745045
7CWT Crane	Bay 1 Locomotive Street	Eveleigh	Sydney	4745058
Ajax Continuous Forging Machine	Bay 2 Locomotive Street	Eveleigh	Sydney	4745081
Allen Striker (1)	Bay 2 Locomotive Street	Eveleigh	Sydney	4745091
Allen Striker (2)	Bay 2 Locomotive Street	Eveleigh	Sydney	4745094
Anvil	Bay 2 North Locomotive Stre	Eveleigh	Sydney	4745101
Anvil	Bay 1 North Locomotive Stre	Eveleigh	Sydney	4745234
Anvil	Bay 1 South Locomotive Stre	Eveleigh	Sydney	4745064
Anvil base	Bay 1 South Locomotive Stre	Eveleigh	Sydney	4745320
Anvil base	Bay 2 North Locomotive Stre	Eveleigh	Sydney	4745323
Anvils	Bay 2 Locomotive Street	Eveleigh	Sydney	4745472
Anvils (4)	Bay 1 South Locomotive Stre	Eveleigh	Sydney	4745408
Arrol Overhead Travelling Crane L6	Bay 4 Locomotive Street	Eveleigh	Sydney	4745196
Assemblage of tools	Bay 2 Locomotive Street	Eveleigh	Sydney	4745325
Avery Platform Scale	Bay 2 Locomotive Street	Eveleigh	Sydney	4745471
Babcock & Wilcox Overhead Travel	Bay 16 Locomotive Street	Eveleigh	Sydney	4745440
Babcock & Wilcox Overhead Travel	Bay 13 Locomotive Street	Eveleigh	Sydney	4745443
Balanced Billet Holder A	Bay 1 Locomotive Street	Eveleigh	Sydney	4745005
Balanced Billet Holder B	Bay 1 Locomotive Street	Eveleigh	Sydney	4745247
Balanced Billet Holder C	Bay 1 Locomotive Street	Eveleigh	Sydney	4745248
Balanced Billet Holder D	Bay 1 Locomotive Street	Eveleigh	Sydney	4745249
Balanced Billet Holder E	Bay 1 Locomotive Street	Eveleigh	Sydney	4745250
Balanced Billet Holder F	Bay 1 Locomotive Street	Eveleigh	Sydney	4745251
Balanced Billet Holder G	Bay 1 Locomotive Street	Eveleigh	Sydney	4745254
Balanced Billet Holder H	Bay 1 Locomotive Street	Eveleigh	Sydney	4745253
Balanced Billet Holder I	Bay 1 Locomotive Street	Eveleigh	Sydney	4745261
Balanced Billet Holder J	Bay 1 Locomotive Street	Eveleigh	Sydney	4745255
Balanced Billet Holder K	Bay 1 Locomotive Street	Eveleigh	Sydney	4745256
Balanced Billet Holder L	Bay 1 Locomotive Street	Eveleigh	Sydney	4745257
Balanced Billet Holder M	Bay 1 Locomotive Street	Eveleigh	Sydney	4745258

Balanced Special Holder	Bay 1 Locomotive Street	Eveleigh	Sydney	4745009
Bay 13 Turntable	Bay 13 Locomotive Street	Eveleigh	Sydney	4745444
Bay 5 Turntable	Bay 10 Locomotive Street	Eveleigh	Sydney	4745411
Bed from Societe Genevoise Hydro	Bay 2 Locomotive Street	Eveleigh	Sydney	4745121
Bed from the Genevoise Drilling an	Bay 8 Locomotive Street	Eveleigh	Sydney	4745122
Bennie Metal Guillotine	Bay 2 Locomotive Street	Eveleigh	Sydney	4745182
Berry hydraulic pipe bender	Locomotive Street	Eveleigh	Sydney	4745212
Billet holders and assorted tools	Bay 1 Locomotive Street	Eveleigh	Sydney	4745071
Blacksmith's Forge	Bay 1 Locomotive Street	Eveleigh	Sydney	4745044
Blacksmith's Forge and Coke bin	Bay 2 Locomotive Street	Eveleigh	Sydney	4745319
Blacksmith's Forge and Coke bin	Bay 2 Locomotive Street	Eveleigh	Sydney	4745298
Blacksmith's Forge No. 18 and Cok	Bay 2 Locomotive Street	Eveleigh	Sydney	4745338
Blacksmith's Forge No. 19 and Cok	Bay 2 Locomotive Street	Eveleigh	Sydney	4745328
Blacksmith's Forge No. 23 and Cok	Bay 2 Locomotive Street	Eveleigh	Sydney	4745087
Blacksmith's Forge No. 24	Bay 2 Locomotive Street	Eveleigh	Sydney	4745088
Blacksmith's Forge No. 25 and Cok	Bay 2 Locomotive Street	Eveleigh	Sydney	4745090
Blacksmith's Forge No. 26	Bay 2 Locomotive Street	Eveleigh	Sydney	4745491
Blacksmith's Forge No. 26 and Cok	Bay 2 Locomotive Street	Eveleigh	Sydney	4745093
Blacksmith's Forge No. 30 and Cok	Bay 2 Locomotive Street	Eveleigh	Sydney	4745367
Blacksmith's Forge No. 36 and Cok	Bay 2 Locomotive Street	Eveleigh	Sydney	4745297
Blacksmith's Forge No. 4 and Coke	Bay 2 Locomotive Street	Eveleigh	Sydney	4745027
Blacksmith's Forge No. 4 and Coke	Bay 2 Locomotive Street	Eveleigh	Sydney	4745357
Blacksmith's Forge No. 9	Bay 1 Locomotive Street	Eveleigh	Sydney	4745059
Bleeder Valve for Fielding and Pratt	Locomotive Street	Eveleigh	Sydney	4745465
Blower	Bay 2 Locomotive Street	Eveleigh	Sydney	4745305
Bolt Rack	Bay 10 Locomotive Street	Eveleigh	Sydney	4745416
Brett Type Impact Punch	Bay 1 Locomotive Street	Eveleigh	Sydney	4745051
British Electrical Vehicle (BEV)	Bay 11 Locomotive Street	Eveleigh	Sydney	4745430
Brown & Sharpe Line Shafting	Bay 2 Locomotive Street	Eveleigh	Sydney	4745339
Brown & Sharpe Universal Grinder	Bay 15 Locomotive Street	Eveleigh	Sydney	4745137
Brownbuilt Lockers	Bay 2 Locomotive Street	Eveleigh	Sydney	4745343

BSA Centreless Grinder	Bay 15 Locomotive Street	Eveleigh	Sydney	4745130
Bucket of tools	Bay 2 Locomotive Street	Eveleigh	Sydney	4745306
Buckets of tools (4)	Bay 2 Locomotive Street	Eveleigh	Sydney	4745360
Buffer Grinder and Quenching Bath	Locomotive Street	Eveleigh	Sydney	4745105
C36-class Boiler	Bay 2 Locomotive Street	Eveleigh	Sydney	4745188
C36-class Boiler	Bay 2 Locomotive Street	Eveleigh	Sydney	4745191
C36-class Boiler	Bay 2 Locomotive Street	Eveleigh	Sydney	4745190
C36-class Boiler	Bay 2 Locomotive Street	Eveleigh	Sydney	4745189
C36-class Boiler Header Tank	Bay 2 Annex Locomotive Stre	Eveleigh	Sydney	4745404
Cabin for 16 ton crane L5	Bay 1 Locomotive Street	Eveleigh	Sydney	4745264
Cart and tools	Bay 2 Locomotive Street	Eveleigh	Sydney	4745308
Churchill Grinder	Bay 10 Locomotive Street	Eveleigh	Sydney	4745104
Cincinnati Milling Machine	Bay 2 Locomotive Street	Eveleigh	Sydney	4745120
Collection of casting boxes	Bay 2 Locomotive Street	Eveleigh	Sydney	4745303
Collection of crane slings	Bay 1 Locomotive Street	Eveleigh	Sydney	4745016
Collection of Davy Press tools	Bay 1 Locomotive Street	Eveleigh	Sydney	4745235
Collection of Large Circular Dies, S	Bay 1 Locomotive Street	Eveleigh	Sydney	4745017
Collection of light fittings	Bay 1 Locomotive Street	Eveleigh	Sydney	4745263
Collection of patterns and miscella	Bay 2 Locomotive Street	Eveleigh	Sydney	4745374
Collection of Swage Blocks and Di	Bay 1 Locomotive Street	Eveleigh	Sydney	4745023
Collection of tools on top of workbe	Bay 2 Locomotive Street	Eveleigh	Sydney	4745372
Counterweight Guard for Churchill	Bay 2 Locomotive Street	Eveleigh	Sydney	4745312
Covmac Continuous Forging Machi	Bay 2 Locomotive Street	Eveleigh	Sydney	4745085
Crane pulley carriage and chains	Locomotive Street	Eveleigh	Sydney	4745454
Crane pulley carriage and rope	Locomotive Street	Eveleigh	Sydney	4745457
Crane Tong Support (disposed ite	Locomotive Street	Eveleigh	Sydney	4745073
Craven Axle and Journal Lathe	Bay 10 Locomotive Street	Eveleigh	Sydney	4745168
Craven Bros Plate Rollers	Locomotive Street	Eveleigh	Sydney	4745181
Craven Brothers Pedestal Drill	Bay 15 Locomotive Street	Eveleigh	Sydney	4745127
Craven Brothers Spring Disassemb	Bay 4 Locomotive Street	Eveleigh	Sydney	4745152
Craven Brothers Traverser	Bay 10 Locomotive Street	Eveleigh	Sydney	4745427
Craven Crane Name Plates	Locomotive Street	Eveleigh	Sydney	4745219
Craven Overhead Crane	Bay 1 Locomotive Street	Eveleigh	Sydney	4745207
Craven Overhead Travelling Crane	Bay 11 Locomotive Street	Eveleigh	Sydney	4745429
Craven Overhead Travelling Crane	Bay 16 Locomotive Street	Eveleigh	Sydney	4745439
Craven Overhead Travelling Crane	Bay 16 Locomotive Street	Eveleigh	Sydney	4745446
Craven Overhead Travelling Crane	Bay 12 Locomotive Street	Eveleigh	Sydney	4745435
Craven Overhead Travelling Crane	Bay 4 Locomotive Street	Eveleigh	Sydney	4745197
Craven Overhead Travelling Crane	Bay 10 Locomotive Street	Eveleigh	Sydney	4745419
Crompton Parkinson motor	Bay 2 Locomotive Street	Eveleigh	Sydney	4745375
Cylinder with scrap metal	Bay 2 Locomotive Street	Eveleigh	Sydney	4745340
Cylindrical Grinder	Bay 15 Locomotive Street	Eveleigh	Sydney	4745140
Davis and Primrose Steam Hamme	Bay 2 Locomotive Street	Eveleigh	Sydney	4745029
Davis and Primrose Steam Hamme	Bay 2 Locomotive Street	Eveleigh	Sydney	4745031
Davis and Primrose Steam Hamme	Bay 2 Locomotive Street	Eveleigh	Sydney	4745032

Davis and Primrose Steam Hamme	Bay 2 Locomotive Street	Eveleigh	Sydney	4745028
Davy Hydraulic Reservoir	Bay 1 Locomotive Street	Eveleigh	Sydney	4745003
Davy Press	Bay 1 Locomotive Street	Eveleigh	Sydney	4745001
Davy Steam Intensifier	Bay 1 Locomotive Street	Eveleigh	Sydney	4745002
Davy Steam Reservoir	Bay 1 Locomotive Street	Eveleigh	Sydney	4745004
Davy Work in Progress 1	Bay 1 Locomotive Street	Eveleigh	Sydney	4745006
Davy Work in Progress 2	Bay 1 Locomotive Street	Eveleigh	Sydney	4745484
Davy Work in Progress 3	Bay 1 Locomotive Street	Eveleigh	Sydney	4745485
DC Rectifier	Bay 1 Locomotive Street	Eveleigh	Sydney	4745278
De Burgue electric shears	Bay 1 Locomotive Street	Eveleigh	Sydney	4745206
Demountable timber office	Bay 1 Locomotive Street	Eveleigh	Sydney	4745268
Denham Centre Lathe	Bay 10 Locomotive Street	Eveleigh	Sydney	4745167
Department Double Floor Grinder	Bay 10 Locomotive Street	Eveleigh	Sydney	4745157
Department Lathe	Bay 10 Locomotive Street	Eveleigh	Sydney	4745141
Departmental Grinder	Bay 15 Locomotive Street	Eveleigh	Sydney	4745126
Door hinges	Bay 1 Locomotive Street	Eveleigh	Sydney	4745274
Dual grinder	Bay 2 Locomotive Street	Eveleigh	Sydney	4745040
Edgwick Grinding Table	Bay 2 Locomotive Street	Eveleigh	Sydney	4745174
Electric motor (disposed item)	Locomotive Street	Eveleigh	Sydney	4745175
Electric motor (disposed item)	Locomotive Street	Eveleigh	Sydney	4745163
Electric Motor and Parts (disposed	Locomotive Street	Eveleigh	Sydney	4745176
Electric starter cabinet (disposed it	Locomotive Street	Eveleigh	Sydney	4745164
Engine Shop (former)	Locomotive Street	Eveleigh	Sydney	4745503
Equalising Beams for Diesel Loco	Bay 1 Locomotive Street	Eveleigh	Sydney	4745019
Eveleigh Locomotive Workshops M	Locomotive Street	Eveleigh	Sydney	4745505
Eveleigh Locomotive Workshops P	Locomotive Street	Eveleigh	Sydney	4745500
Fielding & Platt Spring Buckling Pr	Bay 4 Locomotive Street	Eveleigh	Sydney	4745158
Fielding and Platt Wheel Press	Locomotive Street	Eveleigh	Sydney	4745211
Four wheel trolley cart	Bay 10 Locomotive Street	Eveleigh	Sydney	4745420
Four Wheeled Trolley	Bay 1 Locomotive Street	Eveleigh	Sydney	4745115
Frazing and Grinding Wheel	Bay 2 Locomotive Street	Eveleigh	Sydney	4745033
Frazing and Grinding Wheel	Bay 2 Locomotive Street	Eveleigh	Sydney	4745092
Frazing and Grinding Wheel	Bay 2 Locomotive Street	Eveleigh	Sydney	4745083
Frazing Wheel (disassembled)	Bay 2 Locomotive Street	Eveleigh	Sydney	4745410
Frazing Wheel and Saw	Bay 2 Locomotive Street	Eveleigh	Sydney	4745082
Frazing Wheel and Saw	Bay 2 Locomotive Street	Eveleigh	Sydney	4745078
Fuel Tank	Bay 2 Locomotive Street	Eveleigh	Sydney	4745203
Furnace	Bay 1 Locomotive Street	Eveleigh	Sydney	4745129
Furnace	Bay 1 Locomotive Street	Eveleigh	Sydney	4745240
Furnace	Bay 1 Locomotive Street	Eveleigh	Sydney	4745053
Furnace	Bay 1 Locomotive Street	Eveleigh	Sydney	4745048
Furnace	Bay 1 Locomotive Street	Eveleigh	Sydney	4745198
Furnace	Bay 10 Locomotive Street	Eveleigh	Sydney	4745159
Furnace	Bay 10 Locomotive Street	Eveleigh	Sydney	4745161

Furnace (disposed item)	Locomotive Street	Eveleigh	Sydney	4745142
Furnace for Davy Press Billets	Bay 1 Locomotive Street	Eveleigh	Sydney	4745025
Furnace for the Ajax Forming Mach	Bay 2 Locomotive Street	Eveleigh	Sydney	4745079
Furnace for the Covmac	Bay 2 Locomotive Street	Eveleigh	Sydney	4745086
Furnace with blower	Bay 2 Locomotive Street	Eveleigh	Sydney	4745097
Genevoise Drilling and Boring Mac	Bay 8 Locomotive Street	Eveleigh	Sydney	4745134
Globe Pneumatic Hoist	Bay 2 Locomotive Street	Eveleigh	Sydney	4745345
Goulburn Per Way Workshops Plat	Bay 1 Locomotive Street	Eveleigh	Sydney	4745273
Graham & Normanton Shaper	Bay 2 Locomotive Street	Eveleigh	Sydney	4745116
Grinder	Bay 16 Locomotive Street	Eveleigh	Sydney	4745447
Grinder	Bay 10 Locomotive Street	Eveleigh	Sydney	4745405
Guards and tools	Bay 2 Locomotive Street	Eveleigh	Sydney	4745300
Hand crank and wheel	Bay 2 Locomotive Street	Eveleigh	Sydney	4745342
Hand Trolley	Bay 1 Locomotive Street	Eveleigh	Sydney	4745233
Hand Trolley	Bay 10 Locomotive Street	Eveleigh	Sydney	4745418
Hand Trolley for Hot Work (dispose	Locomotive Street	Eveleigh	Sydney	4745010
Height-setting Table	Bay 1 Locomotive Street	Eveleigh	Sydney	4745226
Height-setting Table	Bay 10 Locomotive Street	Eveleigh	Sydney	4745205
Height-setting Table and Swage Bl	Bay 1 Locomotive Street	Eveleigh	Sydney	4745227
Herbert Tool and Cutter Grinder	Bay 10 Locomotive Street	Eveleigh	Sydney	4745119
Herbert Twin Drill and Borer	Bay 10 Locomotive Street	Eveleigh	Sydney	4745138
Hoist	Bay 11 Locomotive Street	Eveleigh	Sydney	4745441
Hoist	Bay 12 Locomotive Street	Eveleigh	Sydney	4745442
Hoist	Bay 14 Locomotive Street	Eveleigh	Sydney	4745223
Hoist	Bay 14 Locomotive Street	Eveleigh	Sydney	4745224
Hoist	Bay 13 Locomotive Street	Eveleigh	Sydney	4745225
Hoist	Bay 13 Locomotive Street	Eveleigh	Sydney	4745445
Hoist	Bay 12 Locomotive Street	Eveleigh	Sydney	4745434
Hoist	Bay 10 Locomotive Street	Eveleigh	Sydney	4745412
Hoist	Bay 10 Locomotive Street	Eveleigh	Sydney	4745414
Hoist	Bay 10 Locomotive Street	Eveleigh	Sydney	4745413
Hoist L241	Bay 13 Locomotive Street	Eveleigh	Sydney	4745436
Hoist L254	Bay 13 Locomotive Street	Eveleigh	Sydney	4745437
Hoist L255	Bay 13 Locomotive Street	Eveleigh	Sydney	4745438
Hot Metal Trolley	Bay 1 Locomotive Street	Eveleigh	Sydney	4745072
Hot-metal Circular Saw	Bay 2 Locomotive Street	Eveleigh	Sydney	4745035
Hydraulic accumulator	Bay 3 Locomotive Street	Eveleigh	Sydney	4745193
Hydraulic accumulator	Bay 3 Locomotive Street	Eveleigh	Sydney	4745194
Hydraulic Press	Bay 1 Locomotive Street	Eveleigh	Sydney	4745052
Hydraulic press (disposed item)	Locomotive Street	Eveleigh	Sydney	4745213
Hydraulic Press and Spring Tester	Bay 4 Locomotive Street	Eveleigh	Sydney	4745156
Hydraulic Ram (disposed item)	Locomotive Street	Eveleigh	Sydney	4745143
Hydraulic Spring Press (disposed it	Locomotive Street	Eveleigh	Sydney	4745144

Metal Work Table for Davy Press	Bay 1 Locomotive Street	Eveleigh	Sydney	4745244
Metal Work Table for Davy Press	Bay 1 Locomotive Street	Eveleigh	Sydney	4745243
Metropolitan Vickers motor	Bay 10 Locomotive Street	Eveleigh	Sydney	4745170
Military objects	Bay 1 Locomotive Street	Eveleigh	Sydney	4745488
Misc motor and machine parts	Locomotive Street	Eveleigh	Sydney	4745455
Motorised pump	Bay 2 Locomotive Street	Eveleigh	Sydney	4745346
Oil Furnace	Bay 1 Locomotive Street	Eveleigh	Sydney	4745056
Oil furnace (large)	Bay 1 Locomotive Street	Eveleigh	Sydney	4745047
One Tonne Jib-Crane	Bay 2 Locomotive Street	Eveleigh	Sydney	4745077
Ormerod Vertical Shaper	Bay 10 Locomotive Street	Eveleigh	Sydney	4745132
Overhead monorail crane	Bay 1 Locomotive Street	Eveleigh	Sydney	4745477
Pallet of guards, scrap metal and t	Bay 2 Locomotive Street	Eveleigh	Sydney	4745321
Parts of small blower	Bay 2 Locomotive Street	Eveleigh	Sydney	4745301
Pattern moulds	Locomotive Street	Eveleigh	Sydney	4745460
Pattern Rack and Patterns	Bay 2 Locomotive Street	Eveleigh	Sydney	4745394
Pedding Haus Shearing Machine	Bay 2 Locomotive Street	Eveleigh	Sydney	4745123
Pile of large work-in-progress billet	Bay 1 Locomotive Street	Eveleigh	Sydney	4745232
Pile of sheeting, tools and fullers	Bay 2 Locomotive Street	Eveleigh	Sydney	4745344
Pile of swages and work-in-progress	Bay 1 Locomotive Street	Eveleigh	Sydney	4745242
Pile of swages, fullers and tools	Bay 2 Locomotive Street	Eveleigh	Sydney	4745348
Pile of tools and work-in-progress	Bay 1 Locomotive Street	Eveleigh	Sydney	4745279
Pile of wheels, work in progress an	Bay 1 Locomotive Street	Eveleigh	Sydney	4745277
Pilot arc welder	Bay 10 Locomotive Street	Eveleigh	Sydney	4745406
Platform trolley (disposed item)	Locomotive Street	Eveleigh	Sydney	4745201
Pneumatic Gap Riveter Gantry	Locomotive Street	Eveleigh	Sydney	4745179
Pope Electric Motor and Baseplate	Bay 10 Locomotive Street	Eveleigh	Sydney	4745165
Pope Motor	Bay 2 Locomotive Street	Eveleigh	Sydney	4745330
Portable Tool Rack	Bay 2 Locomotive Street	Eveleigh	Sydney	4745318
Portable tool rack	Bay 2 Locomotive Street	Eveleigh	Sydney	4745355
Portable tool rack	Bay 2 Locomotive Street	Eveleigh	Sydney	4745356
Portable Tool Rack	Bay 2 Locomotive Street	Eveleigh	Sydney	4745366
Portable Tool Rack	Bay 2 Locomotive Street	Eveleigh	Sydney	4745036
Portable tool rack	Bay 2 Locomotive Street	Eveleigh	Sydney	4745382
Portable tool rack	Bay 2 Locomotive Street	Eveleigh	Sydney	4745381
Portable Welder	Bay 2 Locomotive Street	Eveleigh	Sydney	4745393
Pressure vessel	Bay 3 Locomotive Street	Eveleigh	Sydney	4745192
Pump Room Tool Collection	Bay 3 Locomotive Street	Eveleigh	Sydney	4745464
Punches, Dies and Swage Blocks	Bay 1 Locomotive Street	Eveleigh	Sydney	4745012

Item Name: **Engine Shop (former)**

Location: **Locomotive Street, Eveleigh**

Address: Locomotive Street

DUAP Region: Sydney South

Suburb / Nearest Town: Eveleigh 2015

Historic region: Sydney

Local Govt Area: Sydney

Parish:

State: NSW

County:

Other/Former Names: National Innovation Centre; New Locomotive Shop

Area/Group/Complex:

Group ID:

Aboriginal Area:

Curtilage/Boundary: Within the overall Eveleigh Locomotive Workshops Precinct

Item Type: Built

Group: Transport - Rail

Category: Railway Workshop

Owner: State Government

Admin Codes:

Code 2: NA

Code 3: 483

Current Use: Offices

Former Uses: Locomotive engine workshop

Assessed Significance: **State**

Endorsed Significance: **State**

Statement of Significance: The Engine Shop is one of the few remaining original components of the Eveleigh Railway Workshops. The Engine Shop was added to the site to facilitate the construction of locomotive engines on site, allowing other functions in the Locomotive Workshops to be reorganised. The building served as the workshop where many of the workshops used by the NSW Railways were constructed and maintained in the 20th century.

While modified, the building retains enough key features to demonstrate its original function within the site.

Historical Notes or Provenance: The Engine Shop (originally known as the New Locomotive Shop) was constructed in 1907 to allow the construction of new locomotive engines at Eveleigh. The building was extended to the south in 1914. The building served as the main location for construction of locomotive engines on the site, until such construction ceased altogether in 1952. The building became disused in 1988 when the Workshops were finally shut down and was converted to its present use as commercial office space in the mid-1990s.

Physical Description: The former Engine Shop consists of a large masonry building with a corrugated metal roof. The building presents as two storeys externally but has been reconfigured internally to

Item Name: **Engine Shop (former)**

Location: **Locomotive Street, Eveleigh**

provide three levels. The Engine Shop was built in two sections - the northern section was built in 1907 and consisted of two long bays running north-south with large doors in either end, capable of allowing locomotives in and out of the building. Along the side, the building was divided into 8 bays highlighted with decorative brick pilasters. In 1914, the building was extended to the south. This new section has seven bays along the and a five segment sawtooth roof, facing south. The bays on the sides of the buildings each contain a pair of openable steel arched windows with sandstone sills at the lower level, with another pair of smaller, non-opening steel framed windows with brick sills at the top level. The ends of the buildings repeat this fenestration pattern, with the top arches of the windows picked out in polychrome brick. The external configuration of the building is little changed, save for the loss of the original arched timber doors at either end of the building. A pair of arched timber doors stands permanently open in the centre of the west wall, with the entrance closed off by a new glass foyer inserted within the door opening.

Internally, the building would have originally been one large space which was subdivided as required. An overhead travelling crane ran the length of the building above the west bay. This crane is still present, now fixed in position above the lobby of the building. The interior is supported on a frame of steel columns with a steel roof truss structure. With the conversion of the building into office space in the 1990s, the interior was fitted out with three levels of office accommodation built within the existing building envelope. The lobby area in the middle of the building is the only remaining full height space within the structure. A few historic features have been retained, including the overhead travelling crane, a jib hoist and a row of washbasins.

Externally, a new freestanding, two storey plant room has been built on the east side of the building which contains the air conditioning and other major physical plant for the building.

Physical Condition: The building is fully tenanted as commercial office space and is generally in good condition. The following minor maintenance issues were noted:

Several sandstone sills show evidence of damage and spalling. These should be inspected by a stone specialist and repaired with a sacrificial render, indented and repaired or replaced, as recommended.

Growth of vegetation in some masonry joints. Vegetation should be poisoned, removed and joints repointed as required.

Steel windows show signs of spot rust. Windows should be treated with a rust inhibitor and repainted. Windows with structural rust damaged should be repaired to match the original window profile.

Modification Dates: 1914 - building extended to the south

1952 - construction of new locomotives ceased

Mid-1990s - converted into the National Innovation Centre

Recommended Management: Prepare a Conservation Management Strategy for the building. Undertake routine

Heritage Inventory

maintenance in accordance with normal practice.

Management:

Further Comments:

Criteria a) The Engine Shop was historically important to the Eveleigh Locomotive Workshop[Precinct as it provided a significant new facility for the construction of new locomotive engines, allowing other functions within the Locomotive Workshops Building to be reconfigured.

Criteria b)

Criteria c) The building is a well-detailed early 20th century industrial building.

Criteria d) The Engine Shop contains remnants of the struggle for workers' rights on site, in the form of washbasins installed as a result of industrial action.

Criteria e)

Criteria f) The Engine Shop is rare in the Sydney area and unusual for remaining in association with other key components of the Locomotive Workshops Precinct.

Criteria g) The Engine Shop is a typical early 20th century railway industrial building and is able to demonstrate its function through its scale and layout.

Integrity / Intactness: Relatively intact externally. The interior has largely been reconfigured for commercial office space.

Current Use: Display

Former Uses: Workshop machinery

Assessed Significance: **State**

Endorsed Significance: **State**

Statement of Significance: The Eveleigh Locomotive Workshops Machinery Collection consists of over 400 individual items and represents a significant component of the Eveleigh Railway Workshops and is a substantial remnant of the equipment that was on site during the operational period of the Workshops. The equipment includes a nearly complete assemblage from the Blacksmith's Shop, significant portions of the Spring Shop and Wheel Shop and remnants of the hydraulic power train which drove the equipment. These are the most complete in situ collections of this type in Australia. The machinery demonstrates the evolution in technology and the innovation developed on the site in the construction and maintenance of railway locomotives. Many of the machines demonstrate shop-built modifications and in some cases whole machines are shop-built, which are a testament to the skill and ingenuity of the people who worked on the site. The remaining in situ components of the power systems are rare surviving examples in Australia. As an interpretive resource, the machinery is highly significant to the presentation and understanding of the place and provides a good insight into the changing nature of work and labour in Australia over the course of the 19th and 20th centuries. Elements of the machinery remain functional within the Blacksmith's Shop, which is rare for machinery of this type in Australia.

Historical Notes or Provenance: The Eveleigh Locomotive Workshops Machinery Collection represents a range of machinery in use at the Workshops between the 1880s and the 1980s. The collection comprises over two hundred items of machinery, hand tools and fixed equipment which were used in the construction of locomotives on the site. The Workshops were equipped with a large array of machinery and a substantial staff of skilled tradespeople, who could produce a locomotive from the basic components, using parts and tools manufactured on site. The collection

Item Name: **Eveleigh Locomotive Workshops Machinery Colle**

Location: **Locomotive Street, Eveleigh**

includes a small number of machines from pre-1900, which were originally driven by line shafting along the walls of the bays, powered by four large boilers outside the southern side of Bays 1 and 2. The bulk of the machinery remaining on site dates from the first half of the 20th century and includes equipment that was originally driven by line shafting but was later converted to electricity. Some of the machinery was considered cutting edge technology for its day and the vast majority of it was imported from overseas. The steam power system was converted to gas fired boilers from coal fired boilers in xxx.

Towards the end of the operational life of the workshops, some of the machinery had been converted to computer control for extra precision. The Workshops were progressively shut down throughout the 1980s and much of the equipment on site was sold at auction, though many significant components were saved. Many of the retained machines bear a plaque stating "Do Not Scrap - Property of the National Trust", which were installed by stealth by individuals seeking to preserve the collection, however the machinery was never in fact the property of the National Trust. This gentle deception was however instrumental in preventing many of the items from being sold for scrap or dispersed to other workshops. Since the early 1990s, some of the machinery in Bays 1 and 2 South has been in use by a blacksmith. In the 1990s, the site was progressively developed as the Australian Technology Park and Bays 1 and 2 of the Locomotive Workshop were retained to house and interpret machinery from the site. In the early 2000s, while the site was under the control of the Sydney Harbour Foreshore Authority, many of the machines which had been removed from their original contexts were reinstalled near their original functional positions and interpreted.

See the individual listing cards for specific items of machinery for additional historical information, where known.

Themes:

Designer: Various

Maker / Builder: various

Year Started: 1887 **Year Completed:** 1986 **Circa:** No

Physical Description: The vast majority of the equipment is from the Blacksmith's Shop, in Bays 1 and 2 of the Locomotive Workshop and includes steam hammers, forges and the hydraulic power equipment used to operate the equipment. Much of this equipment is in situ, often in association with racks of hand tools used in conjunction with the machinery. The collection also includes a significant number of the machines from the Spring Shop, which was in a now-demolished building, previously located between the Locomotive Workshop and the Engine Shop. A few machines also remain from the Wheel Shop, which was originally in Bays 10 to 12 of the Locomotive Workshop.

Machinery is located throughout the Locomotive Workshop, although the vast majority is located in Bays 1 and 2. Machinery has been relocated and interpreted to other areas of the building, and most bays retain at least one item of machinery, which includes large overhead travelling cranes and small hoists and jib cranes.

See individual machine listing card for details.

Item Name: **Eveleigh Locomotive Workshops Machinery Colle**

Location: **Locomotive Street, Eveleigh**

Physical Condition: Most machinery is under cover but otherwise unmaintained. Dust, grime and surface rust is common on many machines. The machinery that has been interpreted and is on display in Bays 3 to 16 tends to be in better condition and largely free from problems. A small number of machines are badly affected by rust; these are largely those located outside or are partially exposed to the elements.

Some machinery in Bays 1 and 2 South is in operational condition.

See individual machine listing card for details.

Modification Dates: See individual machine listing card for details. Varies. Most machines show some sign of modification, which may include the installation of safety guards, task lighting or electrification. Some machines are substantially modified or are scratch-built from parts of other machines.

Recommended Management: All individual items of machinery to be tagged in accordance with the S170 Register inventory.

Items identified as significant which are presently stored out of doors are to be relocated under cover, either into Bay 2 North or into appropriate off-site storage.

The collection is not to be further dispersed, except for loans to appropriate institutions under a loan agreement.

Any items which are to be included in an operational lease are to be specifically listed in the lease and maintained in accordance with the recommendations of the S170 Register or further specialist advice, as appropriate.

Management:

Further Comments:

- Criteria a)** The Eveleigh Locomotive Workshops Machinery Collection is historically significant as an assemblage of equipment which demonstrates the manufacturing processes used in locomotive manufacture on the site between the 1880s and the 1980s. The Collection provides an understanding of both the complexity of the manufacturing undertaken in the workshops as well as the transformation in technology over time, from hand-made and hand-worked processes, to computer controlled techniques.
- Criteria b)** The Collection has a strong association with the Eveleigh Locomotive Workshops Site and is a critical component in the understanding and interpretation of the site's history.
- Criteria c)** The Collection contains everything from hand tools to large industrial machinery which illustrates the progression in technology over time. The range of items in the collection assists in the understanding of manufacturing and work practices and the challenges associated with manufacturing complex machines such as locomotives from raw components.
- Criteria d)** The collection would have had a strong personal association for the people who worked and trained at the Workshops, however this connection has been broken since the closure of the

Heritage Inventory

SHI Number

4745505

Study Number

Item Name: Eveleigh Locomotive Workshops Machinery Colle**Location: Locomotive Street, Eveleigh**

workshops in the 1980s.

Criteria e) The Collection has the potential to allow better understanding and interpretation of 19th and 20th century manufacturing and work practices in the construction of locomotives, particularly the blacksmithing trades.

Criteria f) Many of the machines are typical of those which would have been used in other workshops in the 19th and 20th century, however the collection is unique in Australia in its scale and continued association with its original place of use.

Criteria g) Much of the machinery is representative of that which was used in locomotive workshops and blacksmith's shops throughout the world.

Integrity / Intactness: Bays 1 and 2 relatively intact. Other individual machines are out of their original position.

Statement of Significance: The Eveleigh Locomotive Workshops were a key component of the Eveleigh Railway Workshops and were the site of much of the construction and maintenance of steam locomotives in NSW from the late 19th to mid 20th centuries. The Locomotive Workshops were built on a vast scale and allowed the complete manufacture of locomotive engines from basic components. The workshops were a massive enterprise that included thousands of workers working in all of the trades required to build and maintain steam locomotives. While the construction of locomotives was eventually moved off site to the Chullora Workshops, the Eveleigh site continued in operation until the 1980s as a maintenance facility for steam and later diesel locomotives. The site also served as a manufacturing site for military hardware, with an initial trial early in the 20th century and a full-scale production of artillery shells during WWII. Socially, the Workshops were influential on the development of the adjacent suburbs, which developed into areas of low-cost terrace housing to service the large working population on the site. The site was also a significant site in the history of the NSW labour movement, with early unions winning many significant concessions for workers, including Saturdays off and the provision of indoor washing and toilet facilities. Several significant figures in the labour movement worked at Eveleigh, including James McGowan, the first Labour Premier of NSW. In the mid 20th century, the workshops were well known for the activities of the Communist Party of Australia on the site. The site also contains a significant collection of remnant machinery relating to locomotive manufacture in the 19th and 20th centuries.

Historical Notes or Provenance: The Locomotive Workshops are located on the southern half of land that was initially part of a grant to Chisholm in the early 19th century. Chisholm constructed a residence known as Calder on part of the land in the 1820s and the rest of the land was largely undeveloped.

Item Name: Eveleigh Locomotive Workshops Precinct

Location: Locomotive Street, Eveleigh

Chisholm's grant was split by the construction of the railway line from Redfern in 1855. Chisholm's grant was selected as the location for the Railway Yards in 1875 and was resumed in 1878. A compensation price was finally settled in 1880 and the clearing of the site commenced in 1882. The construction of the Railway Yards had the flow-on effect of stimulating the construction of a considerable amount of housing in the local area, to provide accommodation for the workforce.

The construction of the Yards started with the building of Bays 1 to 4 of the Locomotive Workshop, in 1884. The construction of Bays 5 to 15 (now Bays 6 to 16) of the Workshops commenced in 1885. Both sections of the building were completed in 1887. Bays 1 to 4 were built separately to house the dirty trades of blacksmithing, boiler-making and foundry work. In 1896, the Large Erecting Shop was built to the west of the Locomotive Workshop, allowing many tasks to be relocated to the new building. The Carriage Workshops, to the north of the railway line, were built at the same time, being completed by 1897, and were known as Bays 16-25. The Locomotive Workshops also contained the Engine Running Shed, to the west of the Large Erecting Shop, which was demolished in 1960, as well as the Works Manager's Office (on the Locomotive Workshops side of the tracks), the Chief Mechanical Engineer's Office (on the Carriage Workshops side) and numerous other buildings of brick and corrugated metal which served as the Paint Shop, Spring Shop and many other functions. All of these ancillary buildings have been demolished.

In 1900, compressed air plant was installed in an annex to Bays 3 and 4 of the Locomotive Workshops. Modernisation of the site continued in pace with technology, and in 1902 the overhead cranes were converted from rope drive to electric drive, due to the availability of power from the Ultimo Power Station. The progressive electrification of the rest of the site continued over the next 10-15 years. Between 1903 and 1905, the space between Bays 4 and 5 was enclosed to match the rest of the building, and was known as Bay 4A (now Bay 5). In 1907 the New Locomotive Shop was constructed to allow the manufacture of new locomotives on the site. In 1908, four M class steam boilers were installed outside of Bays 2 and 3, to provide steam power for the site. Changes to the workshops continued as functions were shifted or machinery was modernised, but a major report into the operation of the workshops prepared over the course of 1911-1914 recommended the establishment of a new facility elsewhere for some of the functions, as the site was too congested.

In 1923, much of the boiler repair work was shifted to the new railway workshops at Chullora. Manufacture of new locomotives on the site ceased altogether in 1925 and by 1937 much of the repair work had been relocated to Chullora as well. During World War II parts of the site were repurposed for the manufacture of military equipment, including 25lb field artillery shells. This work continued until the end of the war. The construction of new locomotives on the site had a brief resurgence between 1945 and 1952, and the NSW Railways ceased to use steam equipment altogether, in favour of diesel, by 1965.

From that point, the Locomotive Workshops were progressively reorganised to serve a range of different repair functions, including the manufacture and repair of wheels and axles. By the 1980s, the decision had been made to cease operations at the site, which finally occurred in 1988. The site served as the temporary home of Paddy's Markets from 1989 to 1994 and from 1995 was progressively converted to its present use as the Australian Technology Park.

Item Name: **Eveleigh Locomotive Workshops Precinct**

Location: **Locomotive Street, Eveleigh**

The site was an important place in the development of unionised labour in NSW, with the unions successfully lobbying for the workshops to be closed on Saturdays in 1892. Indoor toilets were installed as a result of labour negotiations in 1910. The first Australian Railways Union Shop Committee was established on the site in 1925. Union meetings were held at an area known as Red Square, a red-painted area of pavement outside of Bay 14. During the 1940s and 1950s, the site was also the home to major activity by the Australian Communist Party.

Themes:

Designer: George Cowdery

Maker / Builder: George Fishburn

Year Started: 1882 **Year Completed:** 1897 **Circa:** No

Physical Description: The Eveleigh Locomotive Workshops Precinct consists of a large site to the south of the main railway lines leading into Redfern Station. The Locomotive Workshops Precinct is one half of the overall Eveleigh Railway Workshops, which included both the Locomotive Works and the Carriage Workshops, to the north of the railway line. The Locomotive Workshop Precinct is now the Australian Technology Park and consist of three main historic buildings, a wrought iron water tower and a number of new commercial buildings and land earmarked for commercial redevelopment. The three historic buildings within the Precinct are the Locomotive Workshop, the former Works Managers' Office (now the International Business Centre) and the Engine Shop (now the National Innovation Centre). The modern office buildings further south on the site are not included within the heritage precinct, although this land was originally part of the Workshops site.

Historically, the Precinct encompassed a large area and included the above three buildings as well as a Spring Shop (in the location now known as Innovation Plaza), a Pattern Shop, a Foundry, a Goods Shed, a large Running Shed and the Large Erecting Shop. Of these, only the Large Erecting Shop remains and is outside of the area of this listing. Rails and turntables ran alongside the north end of the buildings to allow locomotives under construction or repair to be moved from bay to bay and building to building using a traverser. Two turntables remain, now used as traffic circles but most of the rail lines have been removed. One traverser has been restored and is interpreted in Bay 10 of the Locomotive Workshop building.

The Locomotive Workshops had the ability to produce entire locomotives from components manufactured on site. Wooden patter moulds were built for individual parts and were cast on site in the foundries. Blacksmiths and machinists were able to fabricate other parts out of steel billets and the wheel shops were able to press and turn the wheels for the bogies. Assembly of the locomotives took place on site as well. At its peak, the Locomotive Workshops employed over 2000 people. The Locomotive Workshop has been converted to commercial office space and a large exhibition hall, with machinery retained in situ in Bays 1 and 2 and other machinery interpreted elsewhere around the building.

The site was managed from the Works Managers' Office (now the International Business

Item Name: **Eveleigh Locomotive Workshops Precinct**

Location: **Locomotive Street, Eveleigh**

Centre), which was the administrative office for the site and contained the Timekeeper's Office as well as the pay office. A large bell on top of the building rang the start and end of shift. The Works Managers' Office has been reconfigured internally and is used as commercial office space. Internally it retains no historic features other than some minor detailing.

The Engine Shop was constructed in 1907 to provide additional space for the assembly of locomotive engines. It consisted of two large bays with overhead cranes. The building has now been converted to commercial office space but retains one of the overhead cranes as a static display item.

See individual building listing card for details.

Physical Condition: See individual building listing card for details.

Modification Dates: The Workshops were progressively converted into a commercial office precinct from the mid-1990s. See individual building listing card for details.

Recommended Management: See individual listing cards for conservation recommendations for individual items.

Management: Recommended Management Review a Conservation Management Plan (CMP)

Further Comments: The curtilage of the Eveleigh Locomotive Workshop Precinct is bounded by the railway line to the north, the top of the hill to the east, the boundary with the Large Erecting Shop to the west and the upper car park to the south. The curtilage specifically excludes the former Workshops land south of the upper car park, and excludes all modern office buildings built on this southern land. The curtilage includes the former Works Managers' Office, the former Engine Shop and the former Locomotive Workshop buildings. Other historic features included within the precinct are all machinery outside the southern and eastern sides of the Locomotive Workshop, the turntables in the southern roadway and the water tower at the east end of the site. The former railway carriage used as offices by 3801 Ltd, located within Innovation Plaza, was brought onto the site in 1995 and has no historical association with the place. It is not included within the curtilage.

Criteria a) The Eveleigh Locomotive Workshops were a key component of the Eveleigh Railway Workshops and were the site of much of the construction and maintenance of steam locomotives in NSW from the late 19th to mid 20th centuries. The Locomotive Workshops were built on a vast scale and allowed the complete manufacture of locomotive engines from basic components.

Criteria b)

Criteria c) The workshops were a massive enterprise that included thousands of workers working in all of the trades required to build and maintain steam locomotives. While the construction of locomotives was eventually moved off site to the Chullora Workshops, the Eveleigh site continued in operation until the 1980s as a maintenance facility for steam and later diesel locomotives. The site also served as a manufacturing site for military hardware, with an initial trial early in the 20th century and a full-scale production of artillery shells during WWII. The remaining buildings and machinery on the site allow this process to be understood and

Heritage Inventory

Statement of Significance: The Locomotive Workshop was the heart of the enterprise at the Eveleigh Railway Workshops site. Established in 1887, it was one of the foremost railway workshops in the world and the largest in Australia. The Workshop contained all trades necessary to fully construct or repair a steam locomotive and was the primary centre of railway construction in NSW until the opening of Chullora Workshops in 1923. The building was also the site of many significant events in the early history of the Australian labour movement, with the railway unions winning many concessions for workers that are now taken for granted. The site was also a major centre of the Australian Communist Party in the mid-20th century. The sheer scale of the workshops and the diversity of activities undertaken within them is a testament to both the importance of the railways in the development of 19th and 20th century NSW and to the skill of the large workshop which operated at the site for 100 years.

Historical Notes or Provenance: The Locomotive Workshops commenced construction in 1887 and was originally built in two parts. Bays 1 to 4, at the east end, contained the 'dirty' trades such as blacksmithing and boilermaking, while Bays 5 to 15 contained the machining, tooling and assembly areas, with the two buildings separated by an open area. This area was infilled in 1905 to become Bay 4A and the boilermaking function extended into it. The Loco Workshops were the hub of locomotive manufacture from the 1880s to the 1930s, when many functions were progressively relocated to the newly-constructed Chullora Workshops. Surrounding the Loco Workshops were separate buildings (now gone) containing auxiliary trades such as springmaking, pattern making, welding, coppersmithing and foundry work. The Loco Workshops employed vast numbers of employees in these trades and many lived nearby in working class suburbs such as Redfern and Erskineville. By the 1960s, the Workshops had begun to wind down as the NSW Railways changed technology to diesel from steam. The

Workshops finally shut in 1988 and were converted to the Australian Technology Park in the mid-1990s.

Themes:

Designer:

Maker / Builder:

Year Started: 1887 Year Completed: Circa: No

Physical Description: The Locomotive Workshop consists of a very large brick building divided into 16 bays running north-south. Each bay was originally used for one or more trades required to repair or manufacture locomotives and their components. The building is of masonry construction with a metal roof and presents as a two storey structure. A series of small annexes have been built along the southern side of the building. Internally, the building is supported on a steel frame and metal roof trusses, which have been incorporated within the redevelopment of the building. Only Bays 1 & 2 at the east end of the building are substantially original, with the remaining bays having been converted to commercial office space, function and exhibition areas in a variety of styles. Items of machinery have been placed on display and interpreted throughout Bays 3 to 16 of the building.

Bay 1 - Blacksmith shop / interpretation area

Bay 2 - Blacksmith shop / interpretation area

Bay 3 - 3 levels of infill offices, commercial kitchen

Bay 4 - atrium, reception/function area, 3 levels of office space at north end

Bay 5 - theatre, 3 levels of infill offices

Bay 6 - 2 levels of infill offices, air conditioning plant on 3rd level

Bay 7 - 2 levels of infill offices

Bay 8 - atrium, cafe, 2 levels of infill offices at north end

Bay 9 - 2 levels of infill offices, board room

Bay 10 - exhibition hall & machinery interpretation

Bays 11 to 14 - exhibition hall

Bay 15 - 3 levels of infill offices

Bay 16 - cafe, 2 levels of infill offices

Originally there were 21 annexes along the south wall of the building built in brick, timber and corrugated metal, however only 12 remain. Several of these have been rebuilt in modern materials to house new functions while others are in original condition.

Annex 1 - historic structure, machinery / workshop space

Annex 2 - historic structure, blacksmith shop

Annex 3 - historic structure, blacksmith shop access & fuel tanks

Annex 4 - historic structure, boilers

Annex 5 - modern structure, commercial kitchen access

Annex 6 - historic structure, pump room

Annex 8a - historic structure with modifications, security office

Annex 9a -

Annex 10a - historic structure with modifications, offices space

481

Item Name: **Locomotive Workshops Building**

Location: **Locomotive Street, Eveleigh**

Annex 12 - modern structure, plant room
Annex 13 - modern structure, plant room
Annex 20a - modern structure, plant room

Physical Condition: Externally, the condition of the building ranges from good to poor, with significant structural defects noted in the southern walls of Bays 1 to 4. The building as a whole exhibits a patina of heavy wear and use, mixed with modern materials.

Internally the building is generally in good condition. Several leaks have been noted in the roof of Bays 1 & 2. Structural issues to the south walls of Bays 1 & 2 are under investigation (July/August 2008)

Modification Dates:

Recommended Management: Update the Conservation Management Plan for the building. Investigate structural issues in Bay 1 & 2 South Wall. Investigate roof leakage issues in Bays 1 & 2. Undertake routine maintenance in accordance with normal practice.

Management:

Further Comments:

Criteria a) The Locomotive Workshops were the centre of railway manufacturing in NSW between the late-19th and mid-20th centuries.

Criteria b)

Criteria c) The Locomotive Workshops are exceptionally large and well-detailed examples of late 19th century industrial buildings, incorporating items such as decorative brick and stonework.

Criteria d) The Locomotive Workshops were socially important as the site where many generations of railway workers were trained. These individuals lived in the surrounding suburbs which reflect the working-class nature of the workforce. The Locomotive Workshops were also important in the development of the Australian union movement, the fight for workers' rights and occupational health and safety. The Workshops were also well known for the strong presence of the Australian Communist Party in the early to mid 20th century.

Criteria e)

Criteria f) The Locomotive Workshops are the largest railway workshop in NSW and the only one containing a substantial collection of original machinery.

Criteria g) The Locomotive Workshops are typical of a large Victorian era railway workshop and are able to demonstrate the scale of railway operations and the variety of processes required in their manufacture.

Integrity / Intactness: Modified for office space but the building is relatively intact. Bays 1 & 2 are largely unchanged from their mid-20th century configuration.

Owner: State Government

Admin Codes:

Code 2: NA

Code 3: 484

Current Use: Display

Former Uses: Water tower

Assessed Significance: **State**Endorsed Significance: **State**

Statement of Significance: The Water Tower is typical of late 19th century railway water towers, consisting of an open-topped riveted wrought iron tank on a metal stand. This tank, while typical of those used throughout the NSW railway network, is an important contributory element to the Eveleigh Locomotive Workshops Precinct and contributes to the understanding of the place as a site of railway manufacturing enterprise. It is also unusual in an urban context.

Historical Notes or Provenance: The specific history of the Water Tower is not known. It was installed on the site in 1925 and is typical of water towers used throughout the railway system in NSW. Water would have been pumped into the tank to serve as a header tank to provide water pressure elsewhere on the site.

Themes:

Designer:

Maker / Builder: Per Way Shop Newcastle

Year Started: 1925

Year Completed:

Circa: No

Physical Description: A square, open-topped tank constructed of riveted wrought iron, atop 16 steel I-beam legs. Water was conveyed into and out of the tank via a pair of pipes on the underside. A metal maker's plate is mounted on the north side. The legs are secured via cross-bracing.

Physical Condition: Fair. The tank shows some rust and requires repainting. Rust on the steel legs requires investigation.

Modification Dates:

Item Name: **Water Tower**

Location: **Locomotive Street, Eveleigh**

Modification Dates:

Recommended Management: Remove rust and repaint in micaceous grey oxide. Investigate legs and repair any structural rust.

Management:

Further Comments:

Criteria a) The Water Tower is associated with the historical operation of the Locomotive Workshops Precinct.

Criteria b)

Criteria c) The Water Tower serves as a local landmark.

Criteria d)

Criteria e) The water tower is able to demonstrate the riveted wrought iron method of construction in use by the railways up until the mid-20th century and one no longer practiced.

Criteria f) The water tower is typical of similar towers constructed by the railways throughout NSW however it is rare for its continued association with the Locomotive Workshops and is unusual in an urban setting.

Criteria g) Typical of railway water towers.

Integrity / Intactness: Intact but non-functional.

Statement of Significance: The Works Manager's Office is one of the few remaining original components of the Eveleigh Railway Workshops. The building was part of the original construction of the Workshops in the 1880s and served as the location of the Works Manager and the pay office for the site. The building also contained the Timekeeper's Office and a bell on the top of the building rang the start and end of shift and controlled the actions of workers at the site. The building was substantially expanded in 1922 as a part of the larger changes to the Locomotive Works during that period. The building demonstrates the separation of management from the main workforce and the manner in which control was exercised over the workforce. While modified, the building retains enough key features to demonstrate its original function within the site.

Historical Notes or Provenance: The Works Managers' Office was built in 1887 as a part of the original construction of the Railway Workshops, which incorporated both the Locomotive Workshops on the south side of the rail line and the Carriage Workshops on the north side of the line. The building was the seat of administrative control within the site, containing both the pay office and the Timekeepers' Office. A large brass bell contained within a decorative cast iron bell tower rang the start and end of shift on the site. The building is located in the north-east corner of the Locomotive Workshops site.

A major expansion was undertaken at the Locomotive Workshops between 1918 and 1928 and the Works Managers' Office was extended at the western end in 1922. The twin gabled two-storey building was extended by 36 feet on both stories along the western side. This change moved the bell tower into the centre of the building, whereas previously it had been located on the west end. The bull-nosed verandah was also extended around the building at

Heritage Inventory

4745502

Study Number

482

Item Name: **Works Managers' Office (former)**

Location: **Locomotive Street, Eveleigh**

this time. Historic photographs from the early to mid 20th century show that the bell had been removed from the building for a period, but it has been reinstated. The bell is no longer functional.

Between 1944 and 1947 a twin gabled extension was added to the east end of the building to provide additional administrative office space. The extension is turned 90 degrees from the main building, giving the structure a T shaped plan. The extension was undertaken in sympathy to the main building in terms of proportion and materials. The building ceased to operate as the Works Managers' Office in the 1980s when the overall Workshops site was shut down.

In 1994/5 the building was the first of the buildings on site to be renovated for the establishment of the Australian Technology Park and is now known as the International Business Centre. The building was reconfigured internally at that time and contains essentially no original features. Externally the building is somewhat modified but not essentially changed from its 1940s configuration.

Themes:

Designer:

Maker / Builder:

Year Started: 1887 **Year Completed:** 1947 **Circa:** No

Physical Description: The former Works Managers' Office retains most of the features from its 1940s incarnation. Internally however the building has been completely reconfigured. The building is a two storey rendered masonry structure with a T-shaped floor plan, with the short leg of the T formed by the 1940s extension on the east end. The building is painted off-white with maroon trim and detailing. A green corrugated metal gabled roof runs the length of the main building, with a double gabled roof on the 1940s extension at 90 degrees. A bull-nosed verandah supported on decorative cast iron columns with iron lace capitals wraps around the west end of the building. Entry to the building is via a door in the east end, which had had a new light and access secure plate glass doors installed in place of the original doors. All external windows have been replaced with non-opening double glazed windows. Metal sun awnings have been installed along some of the first floor windows along the north side of the building. A large freestanding air conditioning plant has been installed on the hardstand area to the north of the building.

Internally, the building has been completely reconfigured. The floor layout consists of small offices and meeting rooms either side of a long central corridor which runs east-west through the building. A lobby area and new staircase have been installed in the ground floor of the 1940s extension at the east end of the building. The first floor of this section is one large office space. New staircases have also been installed in the middle of the building and at the west end.

The only remnant internal features are some sections of ashlar render and render baseboard along the central corridors on both floors. In the first floor corridor is a series of iron rungs built into the wall which provide access to the bell tower.

Item Name: **Works Managers' Office (former)**

Location: **Locomotive Street, Eveleigh**

Externally, the building has a brick retaining wall and staircase along the east end and part of the north wall, where the embankment has been cut back for the building. An interpretive sign has been installed near the south-eastern corner of the building.

Physical Condition: Generally good with only superficial wear to paint. A small fire was started by vandals outside the building in early 2008 which caused only minimal damage to the building exterior.

Modification Dates: 1887-Built; 1922 - Extended to the west; 1944 - Extended to the east; 1994/5 - Converted to the International Business Centre.

Bell tower was removed and reinstated at unknown dates in the mid 20th century.

Recommended Management: Prepare a Conservation Management strategy for the building. Undertake routine maintenance in accordance with normal practice.

For interpretive purposes, consider installing a system to ring the bell on top of the building for special occasions. An electronic, remote operated ringing mechanism would be acceptable provided it is not visible from the ground.

Consider removing the fluorescent light fitting above the main entrance and replacing it with an appropriate period light fitting.

Should a major refit be considered to the IBC, investigate the reinstatement of the original floor plan and staircase arrangement.

Consider replacing metal double glazed windows with traditional double hung timber windows once the present windows reach the end of their life.

Management:

Further Comments:

Criteria a) The Works Managers Office is historically important for its role in the administration of the Eveleigh Locomotive Workshops.

Criteria b)

Criteria c) The Works Managers' Office is a well-detailed late 19th century administrative building incorporating the unusual feature of a bronze bell at its parapet as part of the site's timekeeping mechanism.

Criteria d) The Works Managers Office was socially important to the site as both the source of administrative power on the site as well as the practical necessity of serving as the pay office.

Criteria e)

Criteria f) The Works Managers' Office is uncommon in the Sydney area and unusual in that it survives within the context of the industrial buildings it was originally associated with.

Criteria g)
