

A number of key issues were raised for consideration by Sydney Local Health District during the Community Consultation Forum held on October 30 regarding the proposed installation of an Automatic Dispensing Machine (ADM) at Redfern Community Health Centre.

We acknowledge the need for an open and transparent dialogue and are committed to continued engagement with the community and key stakeholders.

To facilitate this, Sydney Local Health District will establish an ADM Management Plan Working Group.

We would value your contribution and you are invited to attend an ADM Management Plan meeting to be held on **Tuesday 18 December** at Redfern Community Health Centre, from 6pm to 7.30pm.

It would be appreciated if could RSVP Amanda Kassis, A/ Operational Clinical Manager, Drug Health Services, Sydney Local Health District at amanda.kassis@sswahs.nsw.gov.au or via phone on 9378 1300 to advise of your participation.

We look forward to working collaboratively with you regarding this important community initiative.

Dr Teresa Anderson
Chief Executive
Sydney Local Health District
